# The Process of Designing Zecliner®.

## Why a Sleep Recliner?

Consumers are searching online and in retail stores for an alternative sleep as 7% of adults in US are not able or choose not to sleep in a bed. We studied the market and started the process for an alternative sleeping solution.

## Designing the Product

Designing a sleep recliner involves careful thought for both aesthetic and functionality. The process started with conceptualizing a chair that offers optimal comfort for relaxation and sleep.

First Prototype

Final Design

- Clean Transitional design to seamlessly integrate into a customers living space
- Wide seats and full front chaise to offer more seating space and accommodate pets
- Sloped arm for more spacious and comfortable seating space
- Non-handed design to accommodate all users despite their situation/condition (center wand feed through, mirrored pockets)
- Angled pocket for ergonomic wand storing
- Performance fabric that's durable and easy to clean
- USB charging port is included in the hand wand for convenient charging

## Crafting the Perfect Name

Zecliner® is derived by blending the sound of sleeping/snoring ('zzz') with the functionality of a recliner, creating a catchy and memorable name that conveys comfort and relaxation.

A persons body weight is distributed differently when they are reclined vs. in a sleep position. Zecliner incorporates zoned comfort into the backrest and seat for added comfort and for distributing support and cushioning in these areas to ensure proper alignment and minimize pressure points, contributing to improved sleep quality.

Zero Gravity also helps with weight distribution for reclining by allowing you to achieve the optimal neutral body position to reduce strain and tension and help you reach the perfect comfort level.

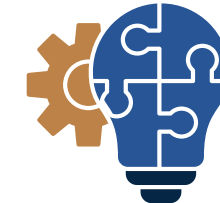

Sleep is crucial for several reasons.

Boosts cognitive function

Strengthens the immune system

Aids in problem-solving

Promotes overall well-being

## Proven to enhance sleep.

Zecliner® was designed and built with restful sleep in mind, making it the ideal choice for a bed-alternative.

## Studies have shown

**84%**

of participants reported pressure relief vs. 16% on previous sleep surface

**95%**

claimed Zecliner® felt weightless vs. 11% on previous sleep surface

**107%**

reported increase in comfort & **180%** increase in feeling cooler

**119%**

reported increase in feeling well-rested

**121%**

reported increase in overall sleep quality

## Empower and enhance your body's energy

### WHAT IS NANOBIONIC?

Nanobionic is a soft coating made of infrared emitting minerals that can be applied to any type of surface, such as clothing, bedding, foam, leather or textile product.

The minerals in the coating get activated with body heat (energy) emitted by your body and return back this enhanced energy to make you a hybrid engine.

Returned energy increases local blood flow allowing your body to enhance recovery, improve athletic performance and promote a more restful sleep. You can now Recycle and Enhance your energy with Nanobionic.

### HOW DOES IT WORK?

#### You are an Energy Source

Your body produces around 100 watts of energy at any given time. Nanobionic lets you use yours.

#### Textiles That Capture Energy

Applied as a soft coating to your fabrics, Nanobionic lets you recycle and enhance the energy emitted by your body. Stop wasting your energy and recharge.

#### Sleep. Recover. Perform.

Nanobionic coating is designed to work with your body at every stage of the day. It recharges you while relaxing during the day and promotes better sleep at night, so you can wake up recovered and restored.

# FABRIC WARRANTY

## THREE-YEAR LIMITED WARRANTY INFORMATION\*

It is Culp’s policy to stand behind the stain resistance and cleaning performance of its LiveSmart category of products for a period of three years from the date of sale to the consumer, provided fabrication guidelines are met and consumer abuse or neglect is not present. This warranty applies to common household stains<sup>1</sup> (specific exclusions being ink marks, crayon, mustard, and vegetable oil based products). This warranty is valid only when used in accordance with its intended use as indoor residential furniture. Damage/staining due to neglect or allowing the fabric to become excessively soiled without cleaning, or resulting from not following the proper LiveSmart cleaning guidelines, is not covered under this warranty. The warranty is voided by the application of any retail-applied fabric treatment or any other chemical treatments applied to the fabric by a party other than Culp.

This warranty applies to the original purchaser of the fabric and covers the replacement cost of the fabric only, at original purchase price. Culp will not be responsible for any other costs of the replacement, such as installation and labor costs.

\*For furniture warranty information, please refer to the warranty tag on your furniture, or see a sales associate.

\*Common household stains include coffee, wine, soda, beer, ketchup, salsa, chocolate syrup, ice cream, jelly, dirt, urine, Crayola magic marker, milk, tea, juices, blood, Kool Aid.
